ITUS has worked for the top UK Law and Accountancy firms for over 10 years. We are a true worldwide organisation with agents in over 130 countries. Contact us today for an informal discussion.

We are members of and regulated by the Association of British Investigators.

This service is used for gathering information and evidence for use in a range of areas where detailed, comprehensive reporting is of paramount importance. Our team of skilled agents are regularly engaged by law firms, government bodies and private individuals to obtain the evidence that is needed to support court proceedings.

Evidence Gathering creates key intelligence and compiles credible information that stakeholders trust. Such evidence can be experimental or observational, qualitative or quantitative, or it can include a mixture of methods. Our experienced team uses a combination of techniques to ensure we obtain strong evidence that's admissible in a court of law. Our team of investigators are meticulous in any analysis of the enquiry we undertake and our skills have been honed over many years to elicit any crucial information often from sources that are reluctant to divulge.

Evidence Gathering enhances the evaluation's utility and accuracy; guides the scope and selection of information and gives priority to the most defensible information. It promotes the collection of valid, reliable, and systematic information. Once we've gathered all the available evidence, we will present it in a clear, concise and comprehensive report that's admissible for use at all forms of courts.
