SELECTED ON DEMAND SERVICES

PC/laptop – Full examination

Includes – 2 full forensic copies of the data (working copy and archive on separate drives), keyword search of all of the data with initial draft report, second keyword search if required with new/altered keywords, final written report with relevant files on optical media.

PC/laptop – Forensic preview

Includes – review of live data (forensically sound) using set of keywords. Relevant files extracted to optical media with informal report re advice/comments on whether/how to proceed. Worth considering regarding the creation of intelligence or initial look at the data when not sure that there is relevant evidence.

Mobile phones – these vary greatly but on the basis that we have access to the PIN or we can crack the PIN, we can interrogate the device (we can do "chip offs" to gain direct access to the memory chip and this will take a little more time). We do have the capability to open encrypted iPhones, which is a specialised service completed under licence.
We can load phones with encrypted spy software to enable you to access all calls, texts, pictures and data (NB you or your company must own the phone).

Satnav systems - are an excellent way of gathering intelligence on where the vehicle has been and when we can interrogate them.

Full Technical Surveillance Counter Measures (TSCM) Bug Sweep of premises including office, desk, phones, boardroom, etc.
Further IT bug sweep of IT systems and each PC (searching for spyware / spy software; and Detailed IT Penetration Testing of your IT system.

EXPERIENCE

Our IT Experts have careers developed in the Criminal Justice sectors. Most have 20+ years in the field. They have knowledge & experience of being Expert Witnesses.
